## DMM-2410D Series
Professional Quad Demodulator

The DMM-2410D professional Quad Demodulator provides operators an ideal solution for multiple channel receiving and remultiplexing operations. Equipped with 4 independent tuners and 1 TS over IP inputs, DMM-2410D ensures compatibility with all transmission media, such as DVB-S2/S/T/T2/C and so on. The DCH-2410D's remultiplexing capabilities enable the creation of new transport streams that are subsets of the original inputted stream. Customized services may be output as multiple SPTS or MPTS over IP, as well as over ASI. All these architectures make the DCH-2410D an ideal product for DTV signals receiving and demodulation.
